

BEPS.Data

Trevor Richardson

7/8/2021

Description:

The Building Energy Performance Standards (BEPS) of buildings greater than 50,000 square feet in Washington DC. BEPS are the minimum threshold of energy performance for individual buildings. BEPS was established as part of the 2018 Clean Energy DC omnibus Act and was essentially designed to show how energy efficient a building is.

Variables:

Address: Address of the building

Zip: Zip code where building is located

Year Built: The year which the building was established

BEPS Score: The BEPS score indicating the energy performance of the building

Meets BEPS: Whether or not a building meets BEPS

Owner: The owner of the building

Property Name: The name of the building

Latitude: The latitude of the building

Longitude: The longitude of the building

Code to Import:

```
beps_data <- read.csv("BEPS.DATA.csv")
```
