

# Meteorite.Landings

Trevor Richardson

7/8/2021

## Description:

Meteorite landings around the world as documented by NASA. The dataset includes 45,716 meteorites with 10 variables such as size, name, year landed and geographical location. The dataset includes NA and missing values.

## Variables:

**Name:** The name assigned to the meteorite

**id:** The ID number assigned by NASA (ID meaning unknown)

**Classification:** The classification of the meteorite

**Mass:** The mass of the meteorite in grams (g)

**Year:** The year of which the meteorite fell

**Latitude:** The latitude of which the meteorite fell

**Longitude:** The longitude of which the meteorite fell
